

# STAAR 5th Grade Math TEKS Skill Checklist:

Student's Name: \_\_\_\_\_

**5.1 Mathematical process standards.** The student uses mathematical processes to acquire and demonstrate mathematical understanding.

- 5.1A: \_\_\_\_\_ Apply mathematics to problems arising in everyday life, society and the workplace.
- 5.1B: \_\_\_\_\_ Use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution.
- 5.1C: \_\_\_\_\_ Select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems.
- 5.1D: \_\_\_\_\_ Communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate.
- 5.1E: \_\_\_\_\_ Create and use representations to organize, record, and communicate mathematical ideas.
- 5.1F: \_\_\_\_\_ Analyze mathematical relationships to connect and communicate mathematical ideas.
- 5.1G: \_\_\_\_\_ Display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication.

5.1 \_\_\_\_\_ MASTERED

**5.2 Number and operations.** The student applies mathematical process standards to represent, compare, and order positive rational numbers and understand relationships as related to place value.

- 5.2A: \_\_\_\_\_ Represent the value of the digit in decimals through the thousandths using expanded notation and numerals.
- 5.2B: \_\_\_\_\_ Compare and order two decimals to thousandths and represent comparisons using the symbols  $>$ ,  $<$ , or  $=$ .
- 5.2C: \_\_\_\_\_ Round decimals to tenths or hundredths.

5.2 \_\_\_\_\_ MASTERED

**5.3 Number and operations.** The student applies mathematical process standards to develop and use strategies and methods for positive rational number computations in order to solve problems with efficiency and accuracy.

- 5.3A: \_\_\_\_\_ Estimate to determine solutions to mathematical and real-world problems involving addition, subtraction, multiplication, or division.
- 5.3B: \_\_\_\_\_ Multiply with fluency a three-digit number by a two-digit number using the standard algorithm.
- 5.3C: \_\_\_\_\_ Solve with proficiency for quotients of up to a four-digit dividend by a two-digit divisor using strategies and the standard algorithm.
- 5.3D: \_\_\_\_\_ Represent multiplication of decimals with products to the hundredths using objects and pictorial models, including area models.
- 5.3E: \_\_\_\_\_ Solve for products of decimals to the hundredths, including situations involving money, using strategies based on place-value understandings, properties of operations, and the relationship to the multiplication of whole numbers.
- 5.3F: \_\_\_\_\_ Represent quotients of decimals to the hundredths, up to four-digit dividends and two-digit whole number divisors, using objects and pictorial models, including area models.
- 5.3G: \_\_\_\_\_ Solve for quotients of decimals to the hundredths, up to four-digit dividends and two-digit whole number divisors, using strategies and algorithms, including the standard algorithm.
- 5.3H: \_\_\_\_\_ Represent and solve addition and subtraction of fractions with unequal denominators referring to the same whole using objects and pictorial models and properties of operations.
- 5.3I: \_\_\_\_\_ Represent and solve multiplication of a whole number and a fraction that refers to the same whole using objects and pictorial models, including area models.
- 5.3J: \_\_\_\_\_ Represent division of a unit fraction by a whole number and the division of a whole number by a unit fraction such as  $1/3 \div 7$  and  $7 \div 1/3$  using objects and pictorial models, including area models.
- 5.3K: \_\_\_\_\_ Add and subtract positive rational numbers fluently.
- 5.3L: \_\_\_\_\_ Divide whole numbers by unit fractions and unit fractions by whole numbers.

5.3 \_\_\_\_\_ MASTERED

**5.4 Algebraic reasoning.** The student applies mathematical process standards to develop concepts of expressions and equations.

- 5.4A: \_\_\_\_\_ Identify prime and composite numbers.
- 5.4B: \_\_\_\_\_ Represent and solve multi-step problems involving the four operations with whole numbers using equations with a letter standing for the unknown quantity.
- 5.4C: \_\_\_\_\_ Generate a numerical pattern when given a rule in the form  $y = ax$  or  $y = x + a$  and graph.
- 5.4D: \_\_\_\_\_ Recognize the difference between additive and multiplicative numerical patterns given in a table or graph.
- 5.4E: \_\_\_\_\_ Describe the meaning of parentheses and brackets in a numeric expression.
- 5.4F: \_\_\_\_\_ Simplify numerical expressions that do not involve exponents, including up to two levels of grouping.
- 5.4G: \_\_\_\_\_ Use concrete objects and pictorial models to develop the formulas for the volume of a rectangular prism, including the special form for a cube ( $V = l \times w \times h$ ,  $V = s \times s \times s$ , and  $V = Bh$ ).
- 5.4H: \_\_\_\_\_ Represent and solve problems related to perimeter and/or area and related to volume.

5.4 \_\_\_\_\_ MASTERED

**5.5 Geometry and measurement.** The student applies mathematical process standards to classify two-dimensional figures by attributes and properties. The student is expected to classify two-dimensional figures in a hierarchy of sets and subsets using graphic organizers based on their attributes and properties.

5.5 \_\_\_\_\_ MASTERED

**5.6 Geometry and measurement.** The student applies mathematical process standards to understand, recognize, and quantify volume.

- 5.6A: \_\_\_\_\_ Recognize a cube with side length of one unit as a unit cube having one cubic unit of volume and the volume of a three-dimensional figure as the number of unit cubes ( $n$  cubic units) needed to fill it with no gaps or overlaps if possible.
- 5.6B: \_\_\_\_\_ Determine the volume of a rectangular prism with whole number side lengths in problems related to the number of layers times the number of unit cubes in the area of the base.

5.6 \_\_\_\_\_ MASTERED

**5.7 Geometry and measurement.** The student applies mathematical process standards to select appropriate units, strategies, and tools to solve problems involving measurement. The student is expected to solve problems by calculating conversions within a measurement system, customary or metric.

5.7 \_\_\_\_\_ MASTERED

**5.8 Geometry and measurement.** The student applies mathematical process standards to identify locations on a coordinate plane.

- 5.8A: \_\_\_\_\_ Describe the key attributes of the coordinate plane, including perpendicular number lines (axes) where the intersection (origin) of the two lines coincides with zero on each number line and the given point  $(0, 0)$ ; the  $x$ -coordinate, the first number in an ordered pair, indicates movement parallel to the  $x$ -axis starting at the origin; and the  $y$ -coordinate, the second number, indicates movement parallel to the  $y$ -axis starting at the origin.
- 5.8B: \_\_\_\_\_ Describe the process for graphing ordered pairs of numbers in the first quadrant of the coordinate plane.
- 5.8C: \_\_\_\_\_ Graph in the first quadrant of the coordinate plane ordered pairs of numbers arising from mathematical and real-world problems, including those generated by number patterns or found in an input-output table.

5.8 \_\_\_\_\_ MASTERED

**5.9 Data analysis.** The student applies mathematical process standards to solve problems by collecting, organizing, displaying, and interpreting data.

- 5.9A: \_\_\_\_\_ Represent categorical data with bar graphs or frequency tables and numerical data, including data sets of measurements of fractions or decimals, with dot plots or stem-and-leaf plots.
- 5.9B: \_\_\_\_\_ Represent discrete paired data on a scatterplot.
- 5.9C: \_\_\_\_\_ Solve one- and two-step problems using data from a frequency table, dot plot, bar graph, stem-and-leaf plot, or scatterplot.

5.9 \_\_\_\_\_ MASTERED

**5.10 Personal financial literacy.** The student applies mathematical process standards to manage one's financial resources effectively for lifetime financial security.

- 5.10A: \_\_\_\_ Define income tax, payroll tax, sales tax, and property tax.  
5.10B: \_\_\_\_ Explain the difference between gross income and net income.  
5.10C: \_\_\_\_ Identify the advantages and disadvantages of different methods of payment, including check, credit card, debit card, and electronic payments.  
5.10D: \_\_\_\_ Develop a system for keeping and using financial records.  
5.10E: \_\_\_\_ Describe actions that might be taken to balance a budget when expenses exceed income.  
5.10F: \_\_\_\_ Balance a simple budget.

**5.10 \_\_\_\_ MASTERED**

**ALL SUPPORTING STANDARDS:**

- 5.1.A use place value to read, write, compare, and order whole numbers through the 999,999,999,999  
5.1.B use place value to read, write, compare, and order decimals through the thousandths place  
5.2.B generate a mixed number equivalent to a given improper fraction or generate an improper fraction equivalent to a given mixed number  
5.2.D use models to relate decimals to fractions that name tenths, hundredths, and thousandths  
5.3.D identify common factors of a set of whole numbers  
5.3.E model situations using addition and/or subtraction involving fractions with like denominators using concrete objects, pictures, words, and numbers  
5.4.A use strategies, including rounding and compatible numbers to estimate solutions to addition, subtraction, multiplication, and division problems  
5.5.B identify prime and composite numbers using concrete objects, pictorial models, and patterns in factor pairs  
5.6.A select from and use diagrams and equations such as  $y = 5 + 3$  to represent meaningful problem situations.  
5.7.A identify essential attributes including parallel, perpendicular, and congruent parts of two- and three-dimensional geometric figures  
5.8.B identify the transformation that generates one figure from the other when given two congruent figures on a Quadrant I coordinate grid  
5.9.A locate and name points on a coordinate grid using ordered pairs of whole numbers  
5.10.A perform simple conversions within the same measurement system (SI (metric) or customary)  
5.10.B connect models for perimeter, area, and volume with their respective formulas  
5.11.A solve problems involving changes in temperature  
5.11.B solve problems involving elapsed time  
5.12.A use fractions to describe the results of an experiment  
5.12.C list all possible outcomes of a probability experiment such as tossing a coin  
5.13.A use tables of related number pairs to make line graphs  
5.13.C graph a given set of data using an appropriate graphical representation such as a picture or line graph.

**Performance Level Descriptors  
Grade 5 Mathematics**

**Students achieving Level III: Advanced Academic Performance can**

- Evaluate the reasonableness of solutions to application problems involving operations with whole numbers
- Make generalizations from patterns and sets of related data
- Extend and apply geometry and measurement concepts to solve application problems including volume

**Students achieving Level II: Satisfactory Academic Performance can**

- Generate equivalent fractions and compare fractional quantities in problem-solving situations
- Solve application problems involving addition and subtraction of whole numbers and decimals
- Solve application problems involving multiplication and division of whole numbers
- Describe the relationship between sets of related data in graphic organizers
- Identify the results of translations, rotations, and reflections on a coordinate grid
- Select and use appropriate units and formulas to solve application problems involving length, perimeter, area, and volume
- Describe and predict the results of a probability experiment
- Find median, mode, and range for a set of data

**Students achieving Level I: Unsatisfactory Academic Performance can**

- Identify equivalent forms of decimals and fractions that name tenths, hundredths, and thousandths using models
- Solve application problems involving length, time, and temperature
- Perform simple conversions in the customary and metric systems
- List the possible outcomes of a probability experiment
